

# NANA Italian ryegrass tetraploid

(*Lolium multiflorum*)

**NANA** is a new variety with Top yields.

Key features:

- x High green mass production
- x Excellent dry matter yield
- x Very quick regrowth after cutting
- x Very good disease resistance, especially against rust
- x High sugar content
- x Good density after the first cut

NANA is a new Westyard variety and registered in 2019 on the EU-list.

Official farm-trials in Germany NANA showed a very high dry matter and a high sugar content.

NANA is suitable for both spring and autumn sowing and can be used for seasonal production or biennial forage production with 4-6 cuts.
