

# VIRGYL Italian ryegrass tetraploid

(*Lolium multiflorum*)

**VIRGYL** is a top variety in tetraploid Italian ryegrass.

Key features:

- x Very high dry matter yield compared to other varieties
- x Highest sugar content in farm tests in Germany
- x Relatively early variety
- x Good resistance to lodging
- x Excellent rust resistance

VIRGYL is a RAGT-variety exclusively represented by Westyard since 2017. It has proven to be a very good and stable variety in France and Germany for many years.

In different farm-trials in Germany it was proven that VIRGYL has a very high dry matter and sugar content.

VIRGYL can be used on all types of soils with a good water supply. It is suitable for both spring sowing and autumn sowing and can be used for seasonal production or biennial forage production with 4-6 cuts.

Other features:

- x Extended green mass production
- x Fast re-growth after each cut
- x Suitable to all types of soils
